

Over 50% of businesses that lose their data never open their doors again. From those businesses that do stay open, 90% end up failing completely within two years. It is easy to see how important it is for you to have the best business continuity plan available. A disaster or emergency can strike at anytime. It can be a natural occurrences, or in the form of theft, sabotage, hardware failure, or user error. Any of these occurrences of data loss can severely threaten a company's business process.

You can save your company thousands, even millions of dollars and insure business continuity should your company suffer from data loss by taking proper actions to protect the company's assets that are stored on the company's desktops, laptops and servers. A critical part of your plan should be a simple reliable scheduled remote backup of your data.

- When your computer needs repair, the service company will not guarantee that the files on your hard drive will still be there when the service is completed.
- Over 25% of data loss is a result of computer program errors, software viruses and natural disasters (factors completely out of your control).

At one time or another, most everyone has suffered a loss of valuable information due to some unforeseen event. Virtually everyone knows that they should backup their critical data, but in reality very few people do. After all, backups take forethought, time, equipment, money, and ultimately, dedication. Most people, even many small businesses, do not back up their systems - even though they know they should. You know you need to back up your data.

Net One provides real-time automated disk backup, disk imaging and file level back up. Our applications and servers are always available since the backup process does not require system downtime. We insure that image and folder backups are immediately and automatically transferred and stored safely away from the business location.

Net One provides the most comprehensive, reliable, and cost effective server and workstation protection.
