computer solutions delivered!

net **ONE**  
Expert IT Managed Services

- It is important for you to have the best business continuity plan available.
- You can save your company thousands of dollars and insure business continuity should your company suffer from data loss by taking proper actions to protect your company.
- A critical part of your plan should be a simple reliable scheduled remote backup of your data.

# What Is It?

Offsite Backup is what it sounds like:

- You have a backup set of data that is nowhere near your main place of business.
- Some or all of the data that flows from computer to computer each and every day is also stored.
- In the event of a catastrophe, you will not lose every shred of your important data.
- You control how often your data is transmitted to the offsite backup.

# Benefits

- **Online backup is automatic, easy and customizable**  
Online backup your files are automatically copied from your PC to a secure offsite data storage location.
- **Get 24 - hour access with reliable technical support**  
Net One's online backup is accessible to you 24 hours-a-day. You can access the online backup service to perform a manual or automatic backup anytime, day or night.
- **Backups are stored in a secure offsite data storage facility** Backing up to a computer offsite means that your data will end up on a different drive or computer, which basically halves the chance of catastrophic loss.
- **Net One's online backup is better than other backup** There's no expensive hardware or external media to purchase or maintain. Everything is accessible from your computer or any Internet connection.
- **Pay as you go & adjust your backup plan as your data grows**  
This is a month-to-month online backup service. Use it as long or as often as you like. There is no contract commitment!

# FAQ's

- **CAN YOU SEE MY RECORDS?**

No. Your files are securely encrypted before they leave your home or office. Only you have the password. No one can access your critical files but you.

- **DO YOU PROVIDE TECHNICAL SUPPORT?**

Yes we do. We will even come to your location and set up the system for you if need be. We also have the ability to do it remotely from our site. Whatever suits your particular situation.

- **HOW SECURE IS MY DATA?**

All data being backed up is compressed and encrypted before leaving your PC. Data is stored at the data centre in this encrypted form.

Authentication traffic between your PC and the data centre is also encrypted. Restores via the web interface are protected using encryption. We use the same encryption that banks use to view your bank account.
